The heart of a Decléor Treatment

Decléor treatments are all based on the same Beauty Treatment Philosophy which is a relaxing way of getting the skin into condition, based on Decléor's very own tactile approach. The heart of a Decléor Beauty Treatment is characterised by three important <relaxation> steps :

- ▶ The back diagnostic massage revives the senses and makes your skin more receptive to the treatment products.
- ▶ Digitopressure and phyto-drainage of the face: In order to re-balance energy, a digitopressure massage is used on the reflex zones of the face. Phyto-drainage is designed to enhance the benefits of the digitopressure massage and promotes the activity of the Essential Oils.
- ▶ Digitopressure and hand massage/scalp massage. To put the finishing touches to total relaxation, the hands or scalp are massaged with Essential Oils while the mask is applied.

Exfoliate, destress and energise. This revitalising treatment starts with an invigorating intensive exfoliation for a pure sensation of energy, the back and legs will be massaged with essential oils of black pepper and cypress to warm the muscles and encourage a deep state of relaxation. The massage continues to the shoulders and the scalp where all the tension that you are holding onto is banished. After showering the skin is then moisturised with the energising circulage which leaves you feeling invigorated and recharged.

Men are kindly requested to wear short briefs or swimming shorts during treatments.
